

OmniNRF

1. Overview

OmniNRF is Omnitouch 5G Network Repository Function (NRF) that 5GC Network Functions (NFs) register and discover each other. OmniNRF is a Network Repository Function (NRF) that provides a centralized database of Network Functions (NFs) and their capabilities. It is a key component of the 5G Core Network (5GC) and is responsible for managing and discovering NF instances. SBI (Service Based Interface) is used for communication between NRF and other NFs.

3. SBI

HTTP/1.1Content-Type: application/json

Nnrf_NFManagement (TS 29.510 5.2)

Method	URI	Request	Response
PUT	/nnrf-nfm/v1/nf-instances/{nfInstanceId}	Registration Request NF	201 Created / 200 OK
PATCH	/nnrf-nfm/v1/nf-instances/{nfInstanceId}	Registration Request JSON Patch	204 No Content / 200 OK
DELETE	/nnrf-nfm/v1/nf-instances/{nfInstanceId}	Registration Request NF	204 No Content
GET	/nnrf-nfm/v1/nf-instances/{nfInstanceId}	Registration Request NF	200 OK
GET	/nnrf-nfm/v1/nf-instances	Registration Request NF	200 OK
POST	/nnrf-nfm/v1/subscriptions	Registration Request NF	201 Created
DELETE	/nnrf-nfm/v1/subscriptions/{subscriptionId}	Registration Request	204 No Content

Nnrf_NFDiscovery (TS 29.510 5.3)

Method	URI	Request	Response
GET	/nnrf-disc/v1/nf-instances	Registration Request NF	200 OK

Registration Request

필드	타입	설명
target-nf-type	string	대상 NF 타입 (UDM, SMF 등)
requester-nf-type	string	요청자 NF 타입 (AMF 등)
service-names	string	서비스 이름 목록
plmn-id	string	JSON 형식의 PLMN ID 목록 { "mcc": "999", "mnc": "70" }
limit	integer	제한 개수

4. 테스트

OmniNRF는 Elixir 프로젝트에서 `:omninrf` 모듈을 사용하여 실행합니다.
`config/runtime.exs` 파일을 열어 설정을 추가합니다.

예시:

```
config :omninrf,
  sbi_scheme: "http",
  sbi_addr: "127.0.0.10",
  sbi_port: 7777,
  mcc: "999",
  mnc: "70",
  heartbeat_timeout: 30_000,
  cleanup_interval: 10_000,
  plmn_list: [%{mcc: "999", mnc: "70"}]
```

5. NF

5.1 NF

When the NF sends a message to the OmniNRF, the OmniNRF updates its state to **NF_DEREGISTERED**.

5.2 NF

validityPeriod 3600 NRF-L5

5.3 NF 등록

5.4 NF deregister
